

Knox County Solar Update

Ratts 2 Project

April 2021

We are pleased to share this update on the Knox County Ratts 2 Solar Project.

Last week, we met a major milestone with the Knox County Area Planning Commission's (APC) approval of the Ratts 2 Solar Project's development plan application. The APC confirmed that the project's development plan meets the requirements of the county's solar ordinance, passed last year, including standards for decommissioning, property buffers and setbacks, and road use.

We are now moving forward with design, engineering and approval from the Drainage Board in order to begin construction in late 2021 or early in 2022.

Your support is important to us. We thank you for your interest in this project and look forward to continuing to work together to bring jobs and economic benefit to Knox County.

Our local representative, Kent Utt, continues to be available for consultations and questions about the project. He can be reached at Kent.utt@gmail.com or 812-890-7443. Information is also available on [our project website](#).
